Professional Experience

EARLY ENGINEER, AIRKIT, INC.; PALO ALTO, CA – JUNE 2018-PRESENT

- Designed, developed, tested, deployed and improved software using React, Redux, Typescript, HTML, CSS, JSON Schema and Kotlin
- Collaborated cross-functionally with design, product and sales
- Realized articulated needs from the founders into many core subsystems of the app builder platform – such as a UI framework, UI control library, theming framework, and authoring tool application
- Built and presented demos for on-sight sales meetings with the company's first key customers

SENIOR MEMBER OF TECHNICAL STAFF, SALESFORCE/SALESFORCEIQ; SAN FRANCISCO, CA – JULY 2016-JUNE 2018

- Worked on a cross-functional team with SalesforceIQ and other acquisitions to add activity insights feature to company's enterprise CRM, Sales Cloud
- Worked on a variety of environments including java, typescript, angular, react and SQLite
- Collaborated with designers to build accessible and localized web applications
- Created an email and calendar sync engine using Google Calendar and Microsoft Exchange APIs for Salesforce Inbox
- Developed a Salesforce Inbox desktop email and calendar client using react-redux, typescript, and SQLite
- Spearheaded the unit testing effort for the Salesforce Inbox desktop client
- Added a mass email feature to SalesforceIQ, the acquired company's CRM using angular, HTML and SCSS
- Worked cross-functionally with Salesforce Inbox team to port mass email feature to google chrome and outlook extensions
- Resolved front-end build issues with npm dependencies and build scripts
